

Power Without Limits

Built for Haulage

Running a haulage fleet on electricity takes serious power—but most depots do not have enough capacity.

Grid capacity upgrades can take years and cost a fortune; even then, they may not meet your future needs.

A Smart Grid from OurNet.Energy delivers the power you need today and scales with your fleet – without the cost, hassle, or lengthy delays.

Why Haulage Depots Choose OurNet.Energy

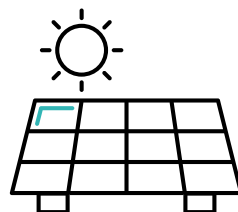

More Power Without Grid Upgrades

Battery storage manages peak demand, avoiding downtime.

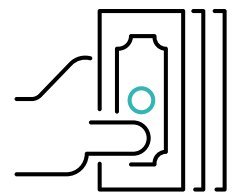

Lower Energy Costs

Pay less for electricity than any commercial provider.

On-Site Solar

Generate, store and use solar energy at your site to minimise grid electricity supply.

No Capital Investment

We fund the solar, batteries, and installation – you just pay for the power you use.

How It Works

STEP 1 DESKTOP SURVEY

We Check Your Energy Needs

- We review your current energy use and future expansion plans.
- Using intelligent modelling, we design a custom Smart Grid solution for your site – at no cost.

STEP 2 SITE SURVEY

We Plan It Properly

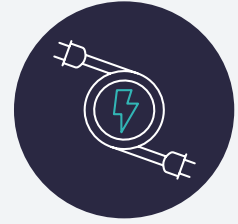

- Our team visits your depot, assesses your setup, and designs a tailored solution that meets your power demands now and in the future.

STEP 3 INSTALLATION

We Do the Hard Work

- Our certified installers set up the system without disrupting your operations.
- No waiting for grid upgrade approvals. No unnecessary infrastructure work.

GO LIVE SAVINGS START

More Power, Lower Costs

- From day one, you get greater charging capacity and lower energy bills.
- Our open-book pricing means no surprises – just lower costs and a future-proof power supply.

What Makes Our Smart Grid Different?

- ✓ **More Power, No Grid Upgrade Delays**
Battery storage smooths peak demand, ensuring continuous charging capacity.
- ✓ **Lower Energy Bills**
Wholesale energy pricing keeps your costs down.
- ✓ **Rapid Installation**
Plug into existing power with no substation upgrades.
- ✓ **Transparent Pricing**
Guaranteed savings with an open-book policy – no hidden fees.

OURNETENERGY
The Smart Choice for Powerful Change

About OurNet.Energy

Established in 2022 and based in Edinburgh, Our.Net Energy is at the forefront of pioneering renewable energy solutions. We champion smart grids, promoting net zero goals without the burdens of upfront costs.

How You Save with OurNet.Energy

1. Use Cheap Power at the Right Time

We store low-cost off-peak energy in batteries, so you can use it when national grid prices are highest – cutting your electricity costs.

2. Subsidised Grid Power with Solar

Our on-site solar reduces your reliance on the grid, supplying cleaner, cheaper energy for your premises and fleet.

3. No Upfront Costs, Lower Monthly Bills

We roll the infrastructure cost into your energy bill, but you still pay less each month than traditional energy providers.
