Achieving Net Zero
Just Got Easier

Meeting the government's EPC legislation and Minimum Energy Efficiency Standards as well as the commercial demands for a net zero sustainable future is an expensive challenge for most organisations. But not achieving this is going to get increasingly onerous. Banks won't be able to fund you, tenants won't want to rent from you, energy costs will increase and retrofitting is getting very, very expensive.
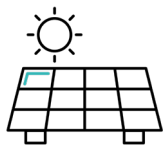

But thanks to **Our Net Energy**, delivering net zero electricity for your business just got easier – and cheaper.

Our Net Energy's Offering:

Guaranteed savings
Pay less for electricity compared to any commercial competitor.

Solar Optimisation
Harness maximum power directly from your site.

Advanced Battery Storage
Our high-capacity BESS stores solar energy and low-cost renewable electricity for 24/7 power to your site.

Zero Setup Fees
We shoulder all costs – solar panels, batteries, and installation.

How do we do this?
Smart Grid: Your Next-Gen Solution

Our ready-to-go 'smart grid' package includes everything: hardware, software, batteries, renewable generation and installation. And with our unique financing, you only pay for the electricity you use.
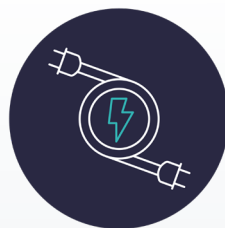

Features:

Proven Technology
Reliable, scalable tech for businesses, including massive battery energy storage systems (BESS) and solar panels.

Transparent Monitoring
Exclusive dashboard to monitor site-wide energy usage down to premise level if required.

Easy Installation
A hassle-free setup, connecting to your existing electricity network.

Competitive Pricing
We guarantee a *minimum of 5% savings* compared to competitors.

Benefits:

Peak Shaving: No more worries about high-demand periods. Our system smartly allocates energy for peak time, overcoming the need for costly grid upgrades

Detailed Reports: Get detailed usage analysis and automated usage statements for every tenant on your site, simplifying billing all through the online dashboards

Data Insights: A real time dashboard informs you for the first time where your site is using energy and therefore where savings, even new revenues can be made.

Ideal for:

- Our Smart Grid is suitable for business sites consuming 500kWh to 5MWh daily – that's typically £3,500 to £35,000 per month in electricity charges.

- The greater your roof or ground space, the greater the solar capacity – all of which helps to reduce your electricity costs.

- We install new-builds as well as retrofitting existing sites. We don't even have to dig any holes!

OURNETENERGY

About Our Net Energy

Established in 2020 and based in Edinburgh, Our Net Energy is at the forefront of pioneering renewable energy solutions. We champion smart grids, promoting net zero goals without the burdens of upfront costs.
